

COVID-19 INVESTMENT PROTECTION

Solomon Ministries and Brother Steve Sanders was traveling through the southeast speaking at churches when he was asked to speak at a prominent church North Carolina. Following Steve's sermon, the past of this church reach out to Steve to discuss his retirement. Steve found that the pastor had all of his investments in the stock market. This investment strategy left the pastor's retirement at a high risk for significant losses.

Steve recommended some investment vehicles for the pastor to move his retirement to that would protect him from wild swings in the market due to external factors that were not under anyone's control. The pastor agreed to move his investments to the resources suggested by Solomon Ministries just before the COVID-19 pandemic struck.

As a result of COVID-19, the stock market lost over 30% of its value. The pastor from North Carolina contacted Steve and told him "he knew God sent Steve to him because if he would have left his money in the stock market, he would have lost over \$90,000.00."

The past thanked God and Solomon Ministries for this divine intervention.
